Agenda

- Today you'll see:
 - Intro to Enterprise at Home
 - Live demo
- Please post questions (or feedback) via the Question box
- Attachments provided for download or visit juniper.net/enterpriseathome
- Get started with a free Mist AP and Juniper firewall program:
 - Indicate your interest in the poll
 - Survey link will be sent after the webinar
 - A rep will reach out to confirm qualifying questions/address & set follow up

The way we work is changing...

An estimated 75 million U.S. employees could work from home.
- Global Workplace Analytics, 2020

According to a recent Gartner CFO survey, nearly a quarter of respondents said they will move at least 20% of their on-site employees to permanent remote positions.*
-Gartner, 2020

62% of employed Americans currently say they have worked from home during the crisis, a number that has doubled since mid-March.
-Gallup, 2020

*Gartner Press Release,

Gartner CFO Survey Reveals 74% Intend to Shift Some Employees to Remote Work Permanently, April 3, 2020, <https://www.gartner.com/en/newsroom/press-releases/2020-04-03-gartner-cfo-surey-reveals-74-percent-of-organizations-to-shift-some-employees-to-remote-work-permanently2>

The Temporary Normal

- ⚠ IT teams are overwhelmed by the needs of a remote workforce who just want to do their jobs
- ⚠ Shift from supporting large corporate offices to “micro-branch offices”
- ⚠ IT teams challenged by how to deploy rapidly, operate, and manage these branch sites
- ⚠ Deploying enterprise Wi-Fi AP’s can be time consuming and complex
- ⚠ Enterprise security perimeter extended to the home office
- ⚠ Malware attacks are on the rise amongst organizations in the news

Don't Get Left Behind

Speed Matters

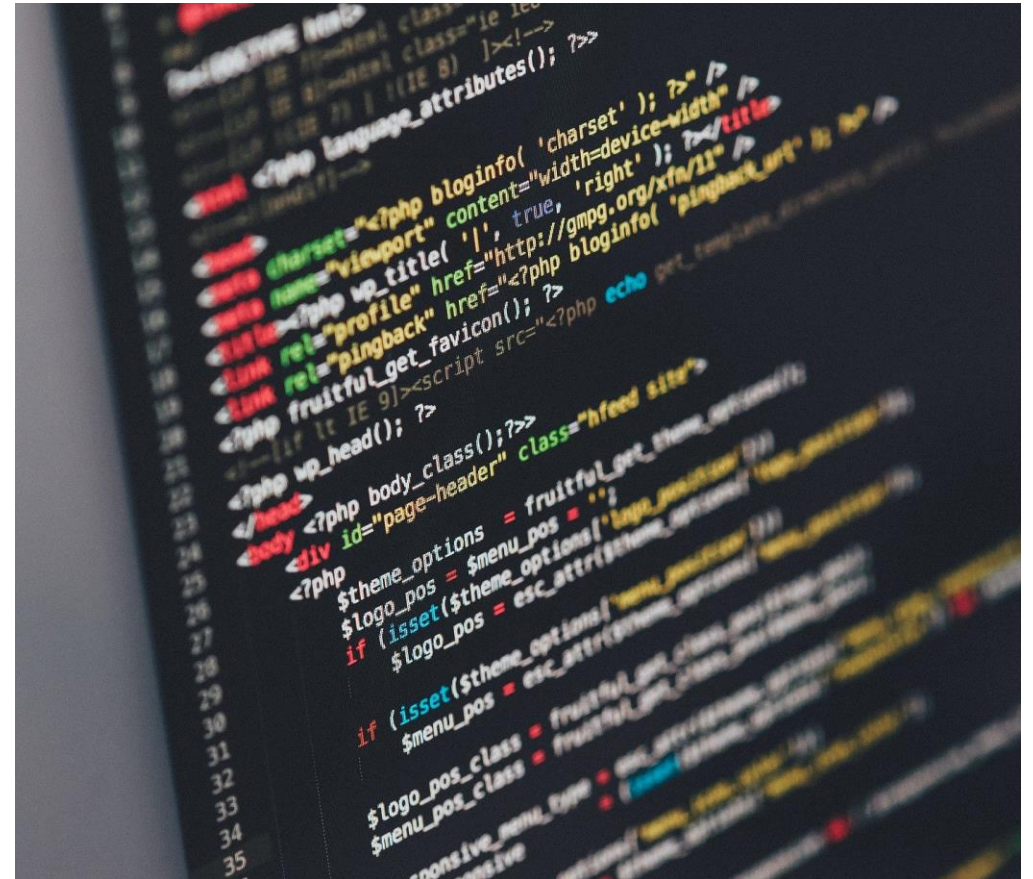

- **Must respond to change and speed**
- **Security must keep up**
- **Business continuity is essential**
- **Security must be essential part of this**

Juniper Connected Security

Benefits of Enterprise at Home

Gain AI-driven insights into user experiences at home and remote offices

Simplify deployments with zero-touch provisioning

Eliminate overlay VPN technologies while extending the enterprise network into employees' homes

Easily monitor business Wi-Fi and keep corporate traffic safe

Increase security while keeping personal and business traffic separate on the home network

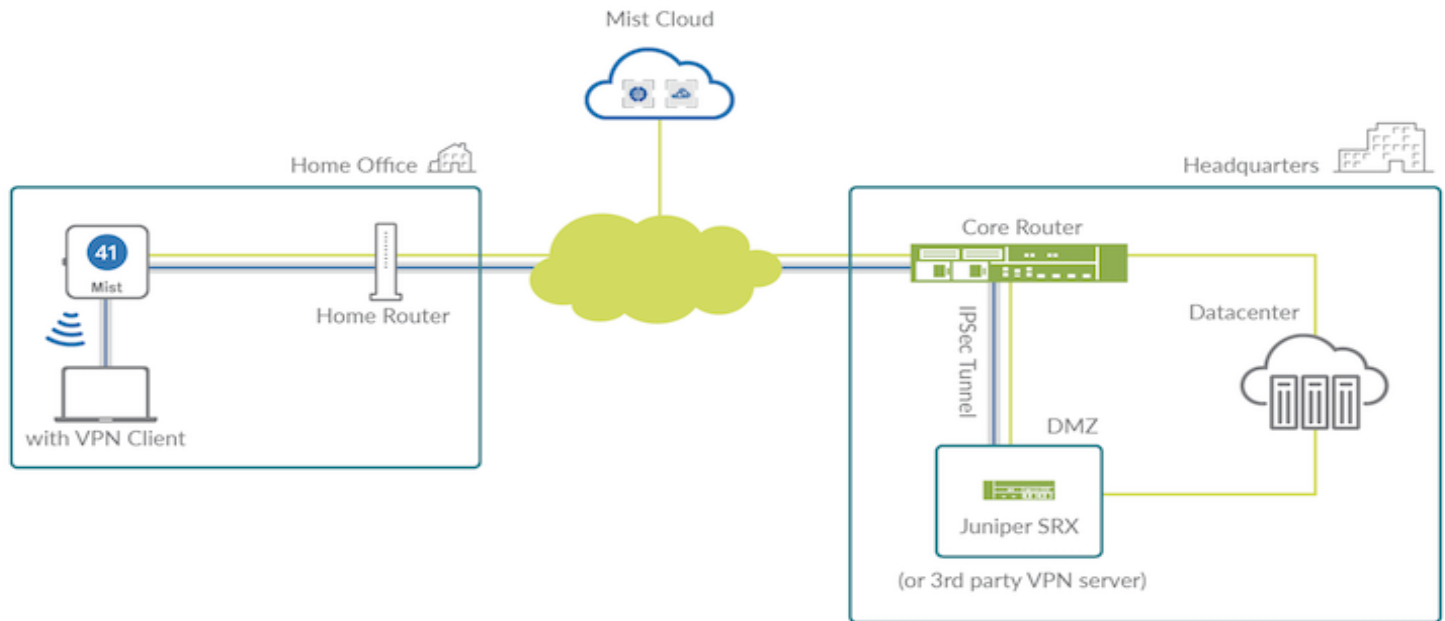

Keep threats in check with advanced security services

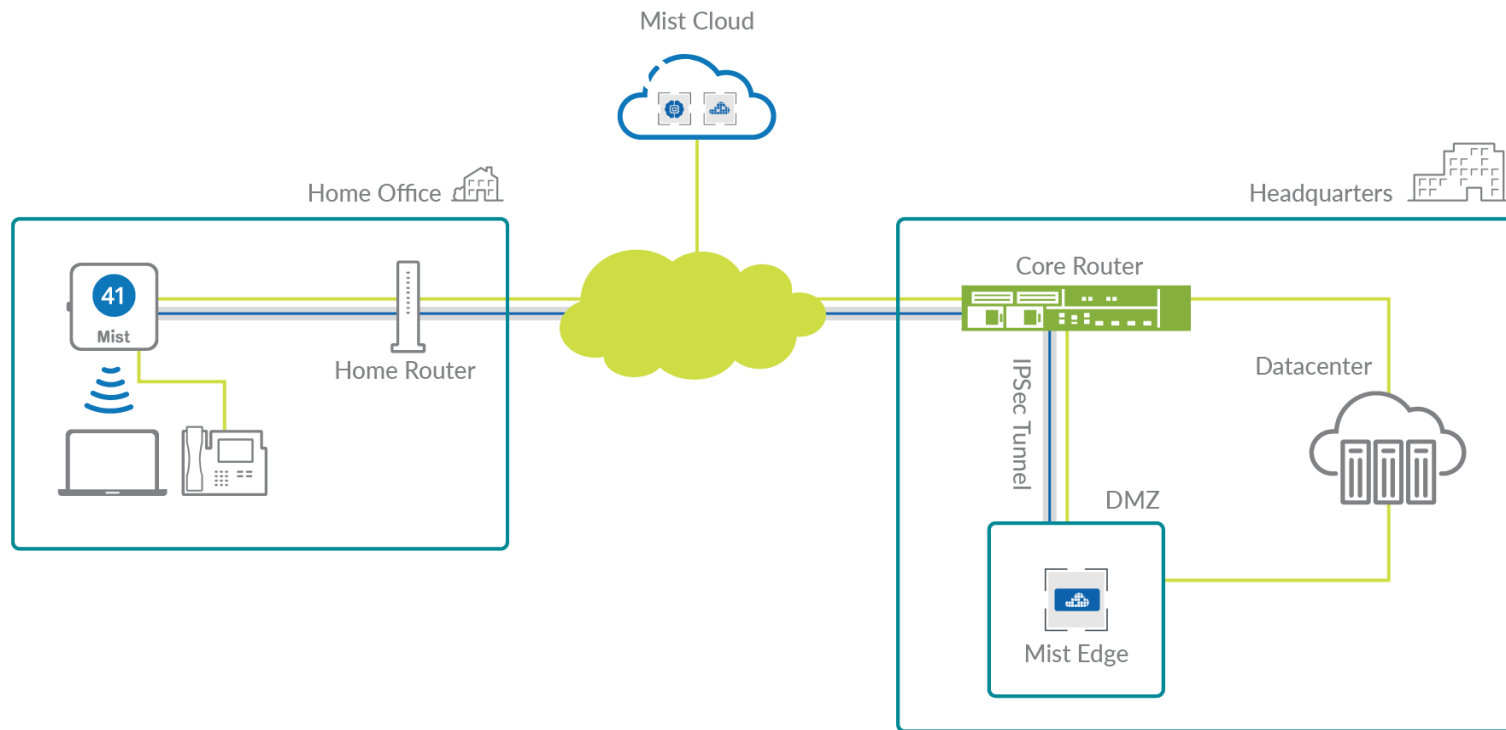

Cultivate a dynamic and flexible network that can adapt as needs change

Solution 1: Mist Wi-Fi for Remote Workers

- Includes Mist Access Point
- Quick set up with ZTP
- Leverage AI-driven insights to boost productivity
- Use Mist's Marvis AI engine to proactively identify network issues and anomalies
- Increase network efficiency
- IT teams remotely manage and troubleshoot home networks with ease

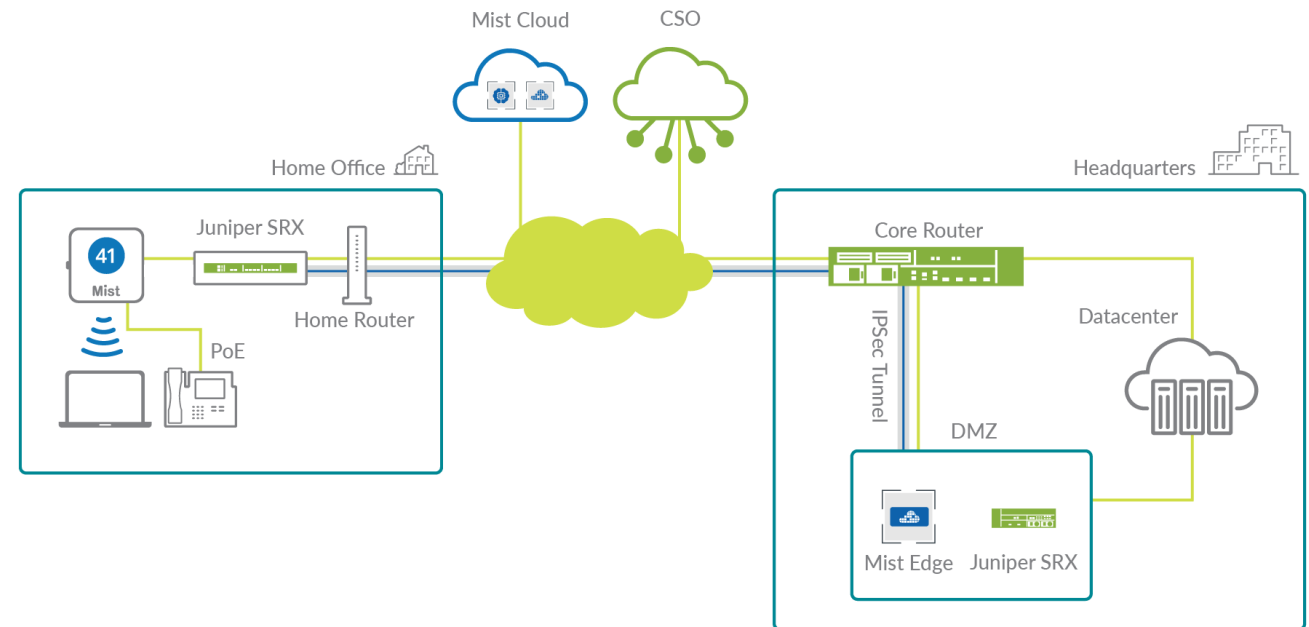

Solution 2: Extend Enterprise Wi-Fi Experience to Home

- Includes Mist Access Point + Mist Edge
- Eliminate costly and complex VPN overlay technologies
- Extend the enterprise network to employee's remote locations
- Securely extend your organizational SSID and authentication services to remote locations

Solution 3: Juniper Connected Security with Mist

- Includes Mist Access Point + Juniper SRX
- Easily monitor business Wi-Fi and keep corporate traffic safe
- Keep personal and business traffic separate
- Enable Secure SD-WAN, Advanced Threat Prevention, cloud-based orchestration, and LTE backup
- Mist Edge can be added to extend the organizational SSID and authentication services to remote locations

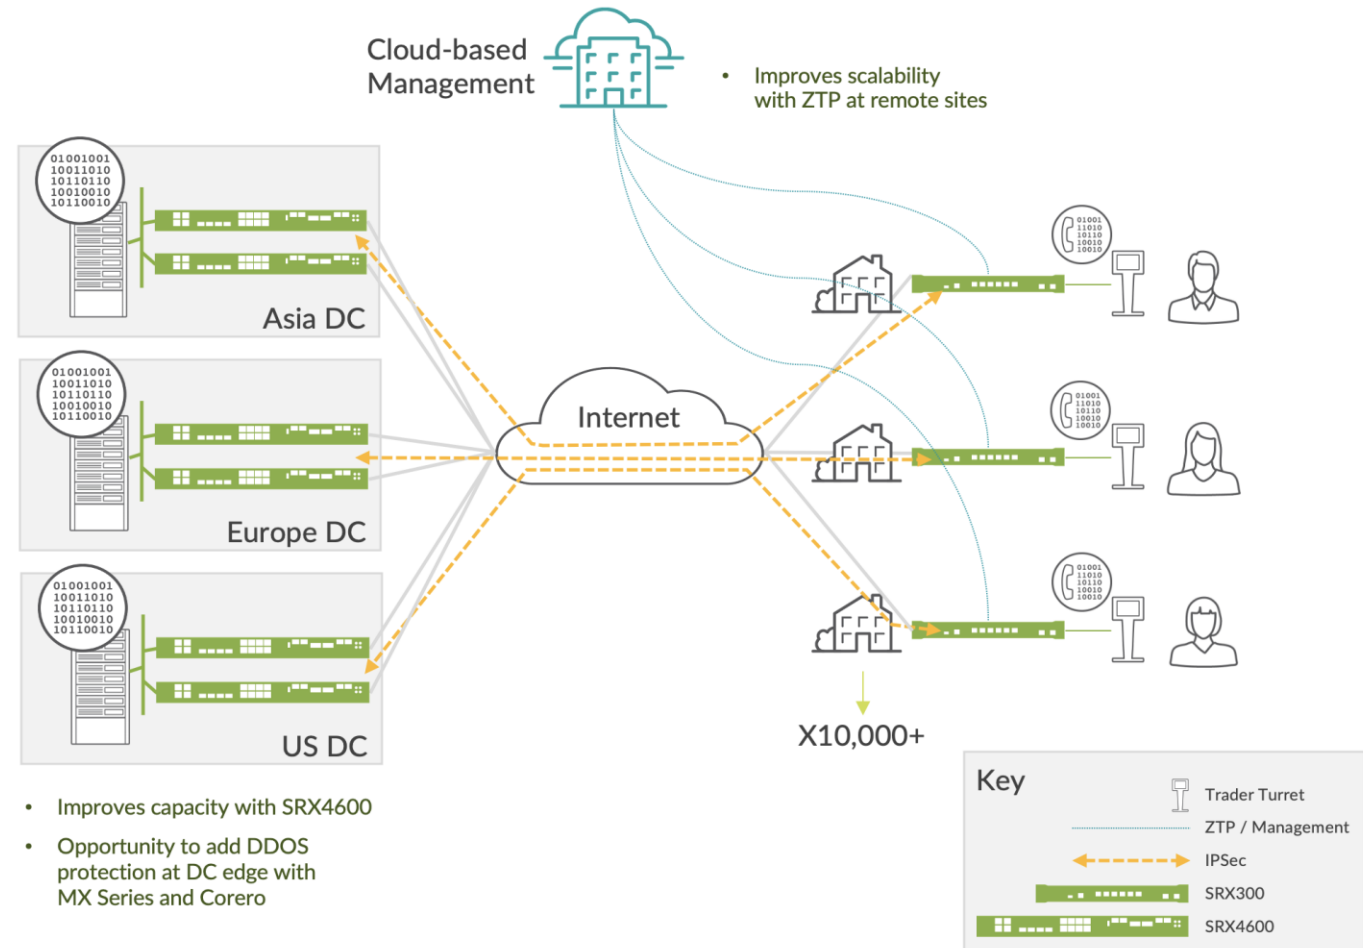

Use Case: Securing the Home Office for Financial Traders

Situation:

- Staff working remotely
- Staff is required to use trading turret
- Turret cannot run on VPN client
- Must be plug & play for non-technical staff

Solution:

- An SRX300 at each remote location, addressing head-end capacity for small packets
- 3 pars of SRX4600s in International Headquarter locations
- Zero-touch provisioning

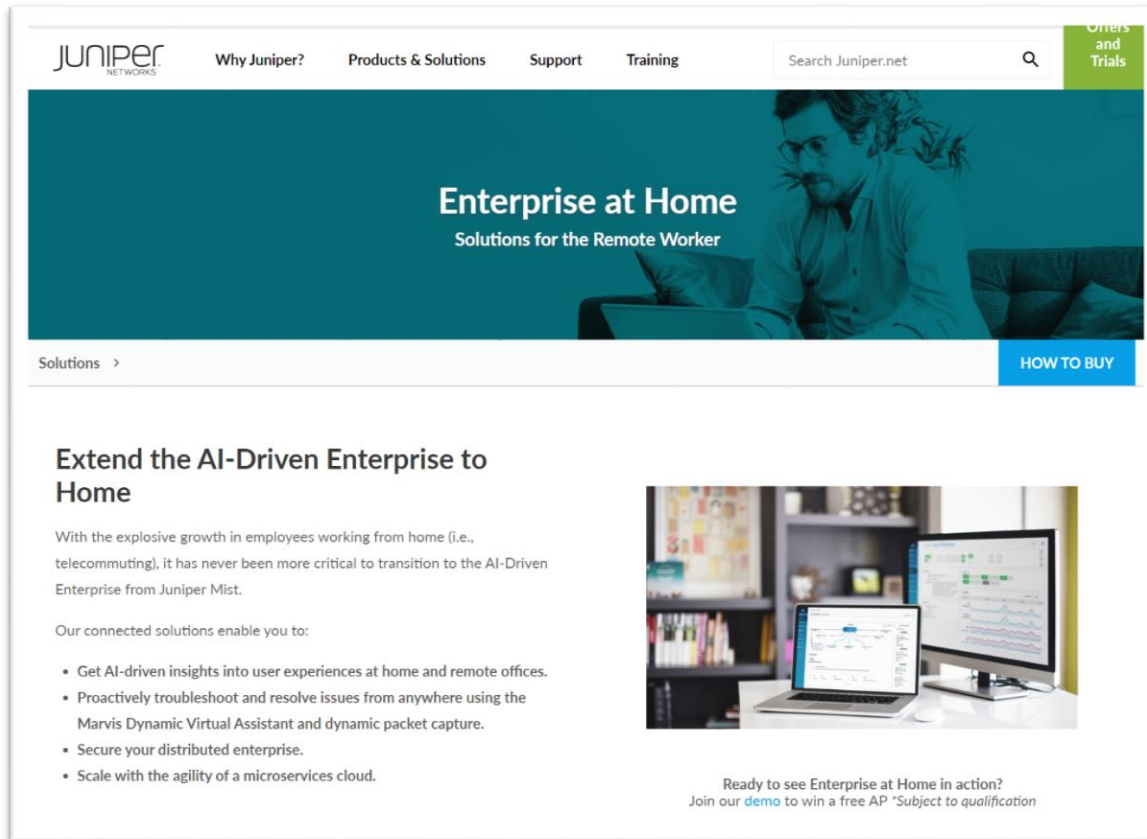

Live Demo

Offers and Resources

www.juniper.net/enterpriseathome

The screenshot shows the Juniper Networks website's 'Enterprise at Home' page. The header includes the Juniper Networks logo, navigation links for 'Why Juniper?', 'Products & Solutions', 'Support', and 'Training', a search bar, and a 'Offers and Trials' button. The main banner features a teal background with a man working on a laptop and the text 'Enterprise at Home Solutions for the Remote Worker'. Below the banner is a 'Solutions >' link and a 'HOW TO BUY' button. The main content area is titled 'Extend the AI-Driven Enterprise to Home' and includes a paragraph about the growth of remote work and the importance of AI-driven enterprise solutions. It lists four key benefits: AI-driven insights, proactive troubleshooting, secure distributed enterprise, and scalability. An image of a home office with a laptop and monitor is shown. At the bottom, there is a call to action: 'Ready to see Enterprise at Home in action? Join our demo to win a free AP *Subject to qualification'.

Extend the AI-Driven Enterprise to Home

With the explosive growth in employees working from home (i.e., telecommuting), it has never been more critical to transition to the AI-Driven Enterprise from Juniper Mist.

Our connected solutions enable you to:

- Get AI-driven insights into user experiences at home and remote offices.
- Proactively troubleshoot and resolve issues from anywhere using the Marvis Dynamic Virtual Assistant and dynamic packet capture.
- Secure your distributed enterprise.
- Scale with the agility of a microservices cloud.

Ready to see Enterprise at Home in action?
Join our [demo](#) to win a free AP *Subject to qualification

Request your free Mist AP and Juniper firewall via the poll.

We will be in touch shortly!

Thank you!
